ABOUT RAILWAY RESERVATION SYSTEM

In Current Railway Reservation System Project User faces various difficulties while booking their tickets by visiting to the reservation counter or by visiting to the agents. Train Ticket Booking System Project will save customers time and money as well. User will get the facility of making their payments of their choice and get entire information after reservations and many more of the login screen.

Finding trains between given routes through simple search query on particular date and displaying all details of that particular train such as arrival time, departure time, number of seats available, class type, charges details and many more. Users will also able to update their profiles and can get details related to their transactions.

Current Train Ticket Booking System does not provide facility of self-cancellation and other facilities such as shortest route details from their current locations. It does not provide details of their previous booking history as well as festive session offer/discounts details. Through this system, user will able to perform various activities using a single windows panel.

To access this Train Ticket Booking System Project, users have to register by giving their entire details such as their name, full address details, sex, age, occupation, date of birth, nationality, mobile number, email id. After successful registration, users will be provided with their login id and password.
